Hotel Address: Marriott Columbus OSU
3100 Olentangy River Road
Columbus, Ohio, USA, 43202

Nearby Airports:

- John Glenn Columbus International Airport
- Rickenbacker International Airport

Transportation Options:

- Lyft/Uber/Taxi
- Convenient and cost-effective bus via the Central Ohio Transit Authority

**SCAN TO RESERVE
YOUR ROOM**

We look forward to seeing you at the Marriott Columbus OSU for an unforgettable conference experience!

TOUR DESTINATIONS

Tuesday's Pre-Conference Tour

Mid-Ohio Food Collective

Yes, we're a foodbank. We collect and distribute an impressive amount of food. But that's not all. We're a hub for caring people who want to give back with their time, talent and treasure. We're a welcome place to imagine and to test out fresh new ideas to tackle tough social issues. We're a collection of passionate people who want to do all we can for poverty and health as a whole. So, when life happens, we're here for our neighbors who need us.

Our mission is to end hunger one nourishing meal at a time while co-creating communities where everyone thrives.

Our vision is hunger-free and healthier communities. <https://mofc.org/>

Acorn Farms Nursery

Acorn Farms Inc was founded in 1976 as a Central Ohio wholesale nursery and tree farm on a 80 acre tract in the Alum Creek Valley of Central Ohio. Acorn Farms continues to grow and expand offering over 800 acres of the highest quality shade and ornamental trees and 80 acres of container stock including wholesale shrubs, perennials, annuals, succulents, poinsettias, mums, bulbs, and seasonal plants. Sales are generated by both on and off site staff, with truck delivery to the US East Coast including New York, Long Island, New England, New Jersey, New Hampshire, Rhode Island, Connecticut, Delaware, and to the Midwest areas of Pennsylvania, Maryland, Michigan, Kentucky, Virginia, W. Virginia, Indiana, Illinois, Wisconsin and Iowa.

We offer a vast selection of the highest quality plant material including hardy, native plants and unique, hard to find ornamentals. Our timely service, whether you are close or far away, has afforded us the opportunity to expand rapidly without compromising quality to become a leading producer of wholesale nursery stock across the US. <https://www.acornfarms.com/>

Oakland Nurseries

Since 1940, Oakland Nursery has been dedicated to bringing high quality plant material to central Ohio homes and businesses. We've grown from a small store on Maize Road, to four retail operations, a wholesale farm, a comprehensive landscape design/build firm, interior/exterior services, and two specialty shops. Today, Oakland Nursery is a diversified company that not only sells horticultural products but designs and installs living landscapes. We offer retail delivery, plant installation, landscape design, landscape construction, irrigation installation, interiorscape design & installation, and wholesale services in our quest of being a total horticultural entity. <https://www.oaklandnursery.com/>

Franklin Park Conservatory

Franklin Park Conservatory and Botanical Gardens is Central Ohio's premier botanical garden and home to the iconic John F. Wolfe Palm House which dates back to 1895. Situated just east of Franklin Park, the Conservatory is approximately two miles from downtown Columbus.

The visitor experience spans about 13-acres and is comprised of the Conservatory building, The Scotts Miracle-Gro Foundation Children's Garden and the Grand Mallway. The experience consists of botanical biomes, lush gardens, special horticulture and art exhibitions, and seasonal offerings. A collection of glass works by artist Dale Chihuly is also on display and included with admission.

The Scotts Miracle-Gro Company Community Garden Campus is a sprawling 4-acre garden adjacent to the visitor experience that encompasses an apiary, rose pavilion, berry house and 40 community garden plots as well as, a demonstration kitchen and Live-Fire Cooking Theater. This area is open to the public at no charge from dawn until dusk. <https://www.fpconservatory.org/>

SPEAKERS & PROGRAM

Theme: Sustainability

KEYNOTE SPEAKER: MARIE CHIEPPO

Ecological Landscape Designer
Accredited Organic Land Care Professional

Bio: Marie Chieppo is a native plant designer and horticulturalist who works with nature to create beautiful landscapes with maximum function for living organisms. For 23 years she has incorporated thousands of native plants in residential, commercial and public settings. <https://ecoplantplans.com/>

Topic: sustainable issues related to plastic use in the nursery industry and alternatives

JOE BOGGS

Assistant Professor, Ohio State University Extension,
Hamilton County
Associated Faculty, OSU Department of Entomology
Co-Leader: OSU Extension, Buckeye Environmental
Horticulture Team (BEHT)

Topic: An Overview of the Box Tree (Boxwood) Moth:
Identification, Biology, Threat, and Management

Program schedule TBA!

RAPID FIRE PRESENTATIONS BACK BY POPULAR DEMAND!

TOUR DESTINATIONS

Wednesday's Tour

Timbuk Farms

Timbuk Farms is one of Central Ohio's oldest and largest Christmas tree farms. The first crop was planted in 1952 and the farm now spans 300 acres.

When the dream of a Christmas tree farm became a reality for the Schmidt family, Granville was quite remote from their home in Columbus. So, a drive to the farm was like a trip to Timbuktu. Thus, the family named the farm "Timbuk."

With many native species of trees, meadows of grasses and wildflowers, rolling hills, and three large ponds, Timbuk Farms is a unique environment and sanctuary for wildlife.

Timbuk Farms is also active in the research and development of evergreen species that are suitable for Christmas trees. The farm has had a major role in developing the Canaan fir as a Christmas Tree that is perfect for Ohio.

In 2004, after 53 successful years in business, the Schmidt family retired and turned the farm and greenhouses over to Jim and LaVonda Gibson of Granville. They have a strong knowledge base of the horticultural industry and are dedicated to producing the highest quality products. The Timbuk Farms name reflects the tree farm's ties to its rich tradition and hospitality as well as to the new energy and commitment to service and quality in its entire farm and greenhouse business. <https://www.timbuk.com/>

Decker's Nursery

From 1921 - Livingston Av, Columbus Ohio | Getting started, doing it with old world - valued and traditional horticulture practices.

The Decker's Nursery, Inc. family nursery business began in the year 1921. The business was founded by Paul Offenberg. Paul was a new immigrant from Holland, where he had been Royal Garden Advisor for Kaiser Wilhelm prior to the beginning of World War I. The business was named The Paul Offenberg Nurseries, and was located in Columbus, Ohio at 1988 E. Livingston Ave. The business was involved in propagation, grafting, liner production, retail landscaping, and general retail sales. In 1945, the business relocated to 3415 E. Livingston Ave. The focus remained the same, however more space was available for evergreen B&B production.

To 1971 - Rager Rd, Groveport Ohio | Expanding with a vision!

In Late 1953, Paul's son-in-law, Bernard J. Decker joined the business as Vice President. Bernard's background was in ornamental iron and steel fabrication, which he had practiced since returning from World War II as a decorated radio operator and gunner in the US Air Force over Europe. The training in steel and construction eventually paid off later in his career. During his time, all greenhouse construction at our present location was fabricated in house under his direction.

Bernard Decker took over the reins of the business and proved to be a quick study as company President, propagator, landscape designer, and nursery sock salesman. In 1967 Bernard was elected President of the Ohio Nurseryman's Association. The business steadily prospered over the years, and in 1974 new land was purchased in Groveport, Ohio as a site for future relocation. At this time, Brian M. Decker, Bernard's son and Paul's grandson, pursued Horticulture as a career, and in 1976 enrolled at The Ohio State University seeking a degree in Horticulture.

Brian graduated in 1979 from Ohio State, and joined the business as a manager and landscape salesman. In 1981, the business relocated to its current location in Groveport. The focus in the gradual construction of the new facility was propagation, pot liner, field B&B production, and container production. In addition, the corporation was reorganized, and the name was changed in 1981 to Decker's Nursery, Inc. In 1992, Brian became President of the company and in 1993, Brian was elected President of The Ohio Nursery and Landscape Association. <https://deckersnursery.com/>

TOUR DESTINATIONS

Thursday's Tour

Millcreek Gardens

Millcreek Gardens was established in 1978, and we grow high quality container-grown Perennials, Herbs, Annuals, Ornamental Grasses, Shrubs, Ferns, and Vines. Our nursery is family owned, and we have been growing finished retail-ready plants on a wholesale basis for nearly five decades. We provide our products to Independent Retail Garden Centers, Landscape Professionals, Farm Markets, Municipalities, and the like in Ohio and the surrounding states. We look forward to growing for you.

Millcreek Gardens is built around an experienced team of growers and customer service members. We employ 25 full-time, and up to 40 additional seasonal workers. Our team includes many Horticulture or plant science graduates, who all share in the day-to-day growing and customer care responsibilities. Our knowledgeable team produces and sells over 1,000,000 containers of premium quality annuals, herbs, perennials, ferns, ornamental grasses, peonies, shrubs, and vines each year. We invite you to meet our amazing team members below. <http://millcreekplants.com/>

Groovy Plants Ranch

Groovy Plants Ranch exists to be a plant oasis full of botanical oddities for everyone to experience. We want all who visit to feel welcomed, comfortable asking questions, and to enjoy their time here. GPR is more than a store, it is an imaginative plant experience. We provide plants in all categories that are both expected favorites and hard to find or unusual.

Groovy Plants Ranch seeks to be a destination garden center by providing high quality plants in all price points. We are committed to growing and maintaining clean, pest free plants for our customers. We are devoted to pushing the envelope on what plants we are able to provide by maintaining stock plants, growing hard to find plants from seed, and breeding efforts. We seek to be on the cutting edge of innovation in the horticulture industry by adopting new best practices and providing excellent new plant varieties.

We employ friendly and knowledgeable staff in all parts of the business. So, when a customer reaches out to us in person, on the phone, or online they are able to receive high-quality, kind, and knowledgeable assistance. We are committed to improving our staff's knowledge by offering enrichment opportunities such as conference attendance, online courses, webinars, and access to industry magazines.

Jared and the team seek to continually improve the experience at GPR by updating the grounds, garden art, and infrastructure. Groovy Plants Ranch regularly receives visits from customers that live hours away. We strive to make the experience exciting no matter how far they drive to get here. <https://www.groovyplantsranch.com/>

CEARC OSU

The Controlled Environment Agriculture Research Complex (CEARC) opened in September 2022 and provides a platform for interdisciplinary research at the nexus of horticulture and crop science, engineering, entomology, plant pathology, food science, computer science, and human nutrition/health. The \$35.8 million project was constructed at Waterman Agricultural and Natural Resources Laboratory and offers dynamic platforms for hands-on teaching, outreach, and engagement activities.

By more accurately controlling environmental factors such as temperature and light, researchers can explore new methods for improving nutrient density and flavor in vegetables and fruits. Large quantities of produce grown under standardized conditions make possible clinical studies examining the efficacy of enhanced nutritional value in the human diet. Advanced sensing technologies optimize harvesting, with integrated machine learning and integrated pest management practices to promote more precise control of insects and pests. The CEARC is an interactive communication hub between departments and stakeholders, enabling collaborations and workshops. <https://buildingthefuture.osu.edu/controlled-environment-agriculture-research-complex>
