

INTERNSHIP PROGRAM

Spring Meadow Nursery proudly employs some of the best people in the horticulture industry, and we are continually looking for qualified candidates to strengthen our team. We offer internships to those looking to gain a well-rounded perspective of the full production cycle while still attending school.

- Free on-site housing provided. Enjoy the summer working in beautiful west Michigan, less than 15 minutes from Lake Michigan
- Get growing experience in all of our production departments: propagation, growing, as well as R&D and stock plants
- Our internship is designed to prepare candidates to be hired on as a full-time salaried grower following completion of the program
- Competitive wage of >\$17 an hour

About Spring Meadow Nursery

Spring Meadow Nursery was founded in 1981 by Dale and Liz Deppe. What started as a small, primarily contract-growing operation has grown to become one of the largest and best-known woody plant liner providers in North America, rooting over 23 million cuttings in 2022. Since our earliest days, innovation has been a key part of our success. We invest in equipment, facilities, plants, and people so that we can provide a better potted liner.

Proven Winners® ColorChoice® Shrubs

Every shrub that bears the Proven Winners® name gets its start at Spring Meadow, starting with up to ten years of trialing and testing to ensure it outperforms everything else on the market. Since 2004, we have introduced over 280 proprietary woody plant varieties, including standard bearers like 'Limelight' hydrangea and Wine & Roses® weigela, and game-changers like Black Lace® elderberry and Bloomerang® reblooming lilac.
